i-tec Metal Cooling Pad for notebooks (up-to 15.6")

i-tec Metal Cooling Pad for notebooks (up-to 15.6")

PRODUCT DESCRIPTION

The stylish metal stand will make your work easier and more comfortable thanks to the adjustable working height of the laptop. The stand is designed for laptops up to 3 kg and display sizes up to 15.6". If you also get the C31PHDMIDOCKPD docking station with the stand, you get a versatile, efficient and ergonomic assistant for your desk (Please note: if you purchased the set with product code C31METALDOCKPADPD, the docking station is already included in this set)

The stand has been designed for ease of use - easy to adjust the angle of the support, but which also allows the stand to be easily transported when folded, so it's no problem to use it both in the office and at home, for example. And because the stand is made of wear- and scratch-resistant metal alloy, it will still look like new even after frequent transport.

The non-slip pads ensure a firm position for your laptop, which will sit firmly and vibration-free on the stand while you work. A great advantage is also the much more efficient passive cooling of the laptop, which can significantly increase its service life.

PRODUCT FEATURES
