Product Name/Title	HyperX Predator DDR4 RGB
Tagline	Hunt your prey with smooth, stunning RGB style.
Text Layer	Give your system brilliant RGB style and the performance needed to stay at the top of the food chain with ultra-fast HyperX® Predator DDR4 RGB*. Easily set up** and show off your unique look thanks to HyperX's Infrared Sync technology, no cables required. Predator DDR4 RGB stays cool while looking great, thanks to the aggressive black heat spreader designed to complement its dazzling light display. Boost your frame rate, keep your streams smooth and power through your highlight reel rendering with speeds of up to 4000MHz and low CL15-CL19 latency. It's available in 8GB-16GB single modules and kits of 2 and 4 with capacities of 16GB-64GB. The Intel XMP-ready and certified profiles are optimised for Intel's latest chipsets and are compatible with many of AMD's latest chipsets – just select the profile and you're ready to go. 100 per cent factory tested at speed, and backed by a lifetime warranty, dependable Predator DDR4 RGB gives you the best of both worlds: extreme performance and maximum peace of mind.
Bullet Points	<ul style="list-style-type: none"> • Stunning RGB style • Patent-pending HyperX Infrared Sync technology • Fierce aluminium heat spreader complements the smooth RGB effects • High-speed, low-latency DDR4 performance • Intel XMP-ready profiles optimised for Intel's latest platforms • Lifetime warranty

* The specification of the extreme overclocking modules listed on this page may be beyond the capabilities of your system hardware. Careful selection of all system components (e.g. CPU, motherboard, PSU) is required to ensure that these modules will function as intended.

These kits are thoroughly tested and verified in house to run at the listed speed. As a backup, we include a 2nd XMP profile at a slower clock speed so you can still achieve great performance if your system cannot handle the included highest speed XMP profile.

As a guide, you can find the processors and motherboard that HyperX used to perform the Intel XMP certification on this page: <http://www.intel.co.uk/content/www/uk/en/gaming/extreme-memory-profile-xmp.html>. This is not a guarantee of compatibility in your system configuration. We cannot guarantee compatibility with all systems; these modules should be installed and used at your own risk.

** Lighting customisable with motherboard RGB control software. RGB customisation support through third-party software may vary.
